Thrust System

DP Dual Power™
For hard materials, pull down the lever, for soft materials, push up the lever. By pulling down the lever, thrust force increases about 40%.

Enhanced SST™
By increasing 20% of contact surface between plunger and valve plate, the thrust force is transmitted to the plunger without reduction, it results in higher durability.

TT Twin Thrust System™
4 edges of valve plates strengthen the thrust force on the plunger. It helps to use hard materials with ease.

Functions

360° RH 360° Rotating Handle™
