GSLOCK™ ENGINEER'S SCALE™ COMPATIBLE CLIP GS-EC25BW

A professional-grade measuring tape featuring an extra-stiff, dual-sided blade with engineer's scale (10ths and 100ths) — built for surveyors, engineers and other infrastructure professionals who require precise measurement or conversion to break down one foot into 10 or 100 increments on civil engineering and site utility works.

Armored Case

Shock-resistant armored case protects the housing from impact during inadvertent dropping.

Strong Hook™

Thickness 0.06 in (1.6 mm).
Strength 4.7 times stronger than standard Tajima hooks.

End Hook Guard

Thick elastomer case armor extends around the body of the tape measure to protect end hook and work surfaces.

Engineer's Scale™

Graduated in decimal feet (10ths and 100ths) for easier calculations on site plans, infrastructure, and topographic features.

Strong Tape™

Extra thick steel generates more stiffness than standard tape measures and scale on both sides of blade allows you to read measurements on back.

Compatible Clip™

Compatible Clip™ fits a range of CLIP-n-HOLD™ systems and standard belts.
